'Ultimate Bottom Board Cleaner'

Patent Pending

Revised 7-15-2021

Discover the easiest, fastest, most convenient way to clean dead bees from any Bottom Board and clean the inspection board on hives with screened bottom boards. No more looking for sticks, fighting with a hive tool or banging knuckles. Ergonomic design is comfortable, with or without gloves and allow you to clear dead bees with just a few passes.

User Guide

- **Cleaning Bottom Board with Hook:**
  - Grip Handle and slide Hook into bottom of hive through the front entrance.
  - If Hook facing Left start on Right side and pivot Left until it hits side and then pull out.
  - If Hook facing Right start on Left side and pivot Right until it hits side and then pull out.
  - For best results scrape in both directions and use swinging motion.
  - Repeat as needed to clear our all dead bees and/or detritus.

- **Cleaning Inspection Board/Bottom Board with scraper:**
  - Remove inspection board from screened bottom board and use Scraper end to remove detritus
  - For best results scrape in both directions.
  - Scraper can be used to clean solid bottom boards when the hive bodies are removed; perfect for post winter/early spring hive management.
